Joshua Caburian

Junior Software Engineer | Full Stack Developer | Integration and Application Development

Location | Phone | Email | GitHub | LinkedIn | Portfolio

SUMMARY

Junior software developer with the Meta Front-End Developer Professional Certificate and a production-style full-stack portfolio project centered on booking integrity, scheduling logic, private uploads, email workflows, and third-party integrations. Brings a non-tech operations background shaped by reliability, customer communication, process discipline, and follow-through on time-sensitive work.

TECHNICAL SKILLS

Languages and Frontend: TypeScript, JavaScript, React 19, Vite, HTML, CSS, responsive UI development

Backend and Data: Supabase, PostgreSQL, Deno Edge Functions, database-backed validation and scheduling logic

Integrations and Deployment: Helcim integration, Resend email workflows, private photo uploads, Vercel, Supabase staging

Testing and Quality: Vitest, Playwright, staging verification, booking integrity checks, integration-focused documentation

PROJECT EXPERIENCE

SignalSource Detailer Website | Full-Stack Booking and Operations Platform — Portfolio Project

- Built a full-stack booking workflow using React 19, TypeScript, Vite, Supabase/PostgreSQL, and Deno Edge Functions.
- Implemented database-backed booking integrity with scheduling/capacity logic designed to protect time slots and reduce race-condition risk.
- Added private customer photo upload support with owner access patterns, plus booking status and operational workflows for service management.
- Integrated Resend-powered confirmation email workflows and staged the app for verification across booking creation, scheduling, uploads, and email.
- Kept Helcim payment integration in place while documenting that live automatic payment-to-booking reconciliation was not fully production-verified.
- Used Vitest and Playwright to cover important booking and application flows, with deployment through Vercel and Supabase staging.

CERTIFICATE

Meta Front-End Developer Professional Certificate | Frontend development, React, JavaScript, UI fundamentals, version control, and applied portfolio work — Meta

EXPERIENCE

Operations and Service Experience | Customer-facing and non-technical roles — Dates available

- Built a work style around reliability, clear communication, and completing scheduled work without losing attention to detail.
- Managed customer expectations by explaining status, constraints, and next steps in plain language under real operational pressure.
- Followed repeatable processes, checklists, and quality standards, strengthening habits that transfer directly to testing and software delivery.
- Handled practical problem solving across shifting priorities, deadlines, and service requirements while staying accountable for outcomes.

ADDITIONAL STRENGTHS

Application debugging | Documentation | Cross-functional communication | Detail-oriented operations | Ownership mindset | Learning quickly from feedback
